Key achievements

- Led development of [Skinrave.gg](https://skinrave.gg), an iGaming platform now generating over \$3M in annual revenue.
- Rebuilt leaderboard ranking from seconds to milliseconds and cut roulette writes 95-99% at 2,000+ concurrent users.
- Eliminated lost updates by replacing read-modify-write with atomic increments across scaled services.
- Lifted daily returning users by roughly 25% on [Forbes Games](https://forbesgames.com), built alongside LinkedIn's own engineers.
- Shipped an AI-backed personal finance app solo, from data model and API design through to LLM cost and abuse controls.

Skills

Languages: TypeScript, JavaScript, Python, SQL, Solidity

Frontend & Mobile: React, Next.js, React Native, Expo, Redux Toolkit, micro-frontends, Storybook

Backend & APIs: Node.js, NestJS, Express, REST APIs, GraphQL, WebSockets, microservices, event-driven architecture

Data & Infrastructure: PostgreSQL, MySQL, MongoDB, TypeORM, Redis, RabbitMQ, Docker, AWS, GCP, CI/CD, Datadog

AI Engineering: Anthropic API, tool-use agents, streaming responses, LLM cost and abuse control, Claude Code

Practices: Agile, Scrum, Jira, Git, Jest, TDD, code review, system design, concurrency and idempotency, mentoring

Work experience

[Optimum Partners](https://optimumpartners.com) · Digital product agency · Remote

Aug 2024 – Present

Software Engineer / Team Lead

- Lead a team of ten across engineering, QA, design on [Forbes](https://forbes.com), building features alongside sprint planning and code review.
- Directed four delivery teams through a six-month [Hearst](https://hearst.com) engagement, then returned to Forbes as hands-on lead.
- Migrated legacy Pug.js templates to React and set the repository-wide linting, type-safety and test coverage standards.
- Run technical interviewing and hiring across the office, setting the bar new engineers are assessed against.

Technologies: TypeScript, React, Next.js, Node.js, Express, Jest, Storybook, Git, GitHub Actions, GCP, Datadog, Jira

[Milies](https://milies.com) · iGaming and community products · Yerevan, Armenia

Jun 2022 – Sep 2023

Software Engineer / Team Lead

and Mar 2024 – Aug 2024

- Led a team of eight, engineers and designers, across two products, [Skinrave.gg](https://skinrave.gg) and [Bondit Club](https://bondit.club).
- Architected the high-concurrency backend as event-driven microservices with pub/sub messaging and in-memory state.
- Built persistent scheduling with full timer recovery, so in-flight deadlines survived server restarts intact.
- Integrated crypto and fiat payment providers behind one idempotent webhook pipeline with atomic balance updates.
- Shipped ERC-721 and ERC-20 contracts on Polygon, learning Solidity from scratch to deliver the token economy.

Technologies: TypeScript, NestJS, Next.js, PostgreSQL, TypeORM, MongoDB, Redis, RabbitMQ, Docker, AWS, Solidity, Web3.js

[EPAM Systems](https://epam.com) · Global software engineering services · Remote

Oct 2023 – Mar 2024

Software Engineer

- Delivered features for [SAP](https://sap.com) inside a micro-frontend architecture, working on both the shell and the apps it composed.
- Built the shared component layer keeping independently deployed apps consistent, and held quality through code review.

Technologies: TypeScript, React, Redux Toolkit, Next.js, Node.js, Express, Storybook, micro-frontends, Jest, Jira

[S2S](https://s2s.am) · Business automation company · Yerevan, Armenia

May 2021 – May 2022

Full-Stack Developer

- Automated warehouse, billing, membership and reporting operations for [Reebok Sport Club Armenia](https://reebok.sport.club/armenia).
- Modernised legacy codebases onto current web stacks and introduced CI/CD pipelines that cut manual deployment steps.

Technologies: TypeScript, JavaScript, PHP, Python, Node.js, React, Redux Toolkit, MySQL, MongoDB, React Native

Projects

[Effable](https://effable.com) · Personal finance app for iOS and Android

2025 – 2026

Founder & Solo Developer (available on iOS since late 2026)

- Derived every balance on read and collapsed multi-tenant access to a single authorisation seam.
- Engineered an agentic workflow with layered instructions and subsystem skills, delivering whole feature slices per commit.

Technologies: TypeScript, NestJS, PostgreSQL, TypeORM, React Native, Expo, Anthropic API, GitHub Actions, Sentry

chordsme.com · Multilingual chords and lyrics platform

Oct 2023 – Jan 2024

Solo Developer (ran live, retired on hosting costs)

- Took a multilingual chords platform from idea to live users alone, parsing chords from free-text lyrics where one regex fails.
- Audited a two-year-dormant codebase for security and data integrity, then retrofitted AI-assisted workflows to relaunch it.

Technologies: TypeScript, Next.js, React, Node.js, Express, MongoDB, Mongoose, JWT, Google OAuth 2.0, Firebase

Education & languages

Yerevan State University, BA Jurisprudence · American University of Armenia, MS Economics · AWS Cloud Practitioner, 2025
Armenian (native) · Russian (fluent) · English (C1, IELTS and TOEFL certified)
